

Job Title: Senior Consulting Natural Resource Scientist / Environmental Engineer

Company: KC Harvey Environmental, LLC

Industry: Environmental Management Consulting, Field Services and Technology

Location: Bozeman, Montana

Position Overview

KC Harvey is a small and growing environmental services firm headquartered in the beautiful Rocky Mountain town of Bozeman, Montana. KC Harvey integrates environmental management consulting with field services and technology development. We provide these services to industrial and government sector clients throughout the U.S., North America and the world. KC Harvey is noted for advancing the application of natural resource science in the fields of water management and soil restoration technologies, among other things. These accomplishments have made a real difference to our oil and gas, mining, energy and government clients, as well as the environment.

KC Harvey is currently seeking qualified natural resource scientists and environmental engineers for senior level consulting positions in our Bozeman, Montana office. The successful candidates will serve as project managers and senior scientists/engineers working with project teams on baseline environmental studies, permitting, NEPA EA/EIS, compliance monitoring, land reclamation and site closure, CERCLA RI/FS and RD/RA, and related projects. This is a unique opportunity to apply your technical and consulting skills and experience and your desire to take a leadership role in developing solutions to interesting environmental issues facing our clients. Our small firm will offer the right individuals a combination of autonomy with the support of a highly reputable and innovative team.

General Duties and Responsibilities

- Provide technical field and office support on environmental projects:
 - Environmental inventory, planning, assessments and permitting
 - Environmental monitoring and inspections
 - Planning and evaluation of remediation, reclamation and restoration projects.
- Conduct natural resource analysis and assessment of proposed development impacts.
- Review and analyze current and emerging regulations applicable to client operations.
- Develop permit/mitigation strategies and negotiate permit conditions with state and federal entities.
- Lead multidisciplinary teams in preparation of high quality client work products.
- Plan, communicate, and manage projects on time and within budget.

- Conduct field work, collect data, and write technical reports.
- Develop new clients and business and manage client relationships.

Required Qualifications

- 7 to 10+ years of experience in environmental consulting with private and public sector clients and projects.
- Undergraduate degree in natural resource science (e.g., soil science, range management, forestry, hydrology, geology, plant ecology) or environmental engineering. An advanced degree is preferred and/or professional designation.
- Extensive knowledge of regulatory requirements of various government agencies related to natural resources and environmental permitting and compliance.
- Strong written and oral communication skills.
- Well organized and have the ability to manage and prioritize several assignments.
- Demonstrated ability to deliver projects on time and on budget.
- Desire to lead, mentor and train a team of scientists and technical staff members.
- A desire to provide excellent and innovative solutions to our customers' technical problems and questions.
- Ability and desire to develop new clients and new business.
- Self-motivated with a strong safety and work ethic.
- Valid driver's license with satisfactory driving record.
- Ability to travel approximately 25% of the time.

Preferred Qualifications and Experience

- Prior consulting experience supporting the oil and gas and/or mining industries.
- Regular involvement in regional and national natural resource/environmental industry organizations.
- Expert, guest speaker or contributing author on topics related to natural resources science, reclamation or related topics.
- 40-hour Hazwoper training and current certification.

Compensation and Benefits

KC Harvey offers competitive compensation packages with the potential for bonuses. Salary is commensurate with experience and skills. Benefits include medical insurance coverage, life and long term disability, 401k, paid vacation, holidays, and sick time.

Application

To apply send resume, cover letter, and references to careers@kcharvey.com. College transcripts may be required to confirm degree credentials. For more information about KC Harvey visit our website at www.kcharvey.com.
