ENVIRONMENTAL CONSULTING JOB OPPORTUNITY

Job Title: GIS Analyst
Company: KC Harvey Environmental, LLC
Location: Bozeman, MT

KC Harvey Environmental, LLC is seeking a GIS Analyst located in Bozeman, Montana or Sheridan, Wyoming to support field service operations and consulting projects. Remote positions will be considered for the right candidate. KC Harvey is an environmental consulting firm headquartered in Bozeman, Montana with operations in Wyoming, Colorado, Utah, North Dakota, Idaho, Texas, and Ohio. KC Harvey provides solutions to environmental issues for the oil and gas, energy, and mining industries. The GIS Analyst will support projects throughout the western US and report to the company Geospatial Director.

Qualifications include:
- A minimum of four years of relevant professional GIS experience
- B.S. in GIS, geography, natural resources, earth sciences or related field
- Proficiency with ESRI ArcGIS suite of applications including ArcPro and ArcGIS Online
- Experience creating and managing spatial datasets including relational tables
- Experience producing cartographic output
- Experience configuring web maps, apps, dashboards, survey123 forms
- Experience using external GPS devices for field data collection
- Proficiency with Microsoft Word, Excel, and Access

Job responsibilities include:
- Provide GIS and data management support for ongoing projects (permitting, reclamation, weed management, soils, NEPA)
- Maintain GIS content to ensure datasets and spatial tools are current, accurate and relevant
- Use geoprocessing tools to create, edit and enrich spatial and non-spatial datasets
- Compile, organize, and manage, data generated from large field data collection efforts
- Configure and setup web maps and survey123 forms for field data collection
- Configure and maintain operational dashboard apps to monitor field data collection
- Coordinate GIS activities with project scientists, clients, regional offices, and other analysts
- Provide data analysis, presentation, and reporting
- Support cartography standards for organizational mapping deliverables

Although not required, a degree or coursework in environmental or natural science or experience in environmental consulting is beneficial. Other beneficial qualifications include programming (Python, Java, VB, .NET, SQL), ArcGIS Server, SQL Server, Model Builder, AutoCAD, as well as a basic understanding of IT concepts.

Compensation includes a salary of $55,000-$65,000/year DOE, 401k retirement, health insurance, paid vacation, sick leave, and holidays. Candidates must have a clean driving record, be willing to maintain high standards of safety, and pass pre-employment and random drug screening. To apply, email a cover letter, resume, college transcripts, and list of three references to careers@kcharvey.com. Position closing date, May 15, 2022.
